

Why& Whatever

W&W

MEMORANDUM OF UNDERSTANDING

Between Why & Whatever (W&W), QIQ AI and Mayilon Silver

Effective Date : 25/06/2026

Parties : This Memorandum of Understanding ("MOU") is entered into by and between:

- 1. Why & Whatever (W&W)**, a business growth and brand strategy entity specialising in branding, marketing, advertising and business development solutions;
 - 2. QIQ AI**, a technology, DevOps, AI and automation solutions entity specialising in platform development, systems integration, workflow automation and intelligent business operations; and
 - 3. Mayilon Silver**, a silver jewellery business engaged in curated, customised and premium silver articles, gifting and jewellery experiences.
-

1. Purpose of the MOU

The purpose of this MOU is to establish a strategic collaboration framework under which W&W and QIQ AI shall provide an integrated Stage 1 brand, commerce, technology, automation, creative and go-to-market launch system for Mayilon Silver. The Parties intend to transform Mayilon Silver from a locally trusted silver business into a structured D2C commerce brand with a measurable digital sales ecosystem.

The Stage 1 mandate includes the connected business capabilities below:

- brand positioning, identity and communication architecture;
- e-commerce, customer enquiry, CRM and inventory foundations;
- organic content, campaign, advertising and audience strategy;
- WhatsApp, lead-routing, AI support and workflow automation; and
- launch readiness, SOPs, training and a Stage 2 scale roadmap.

The Parties acknowledge that the engagement is not limited to a website or social media output. It is a coordinated operating foundation, with each workstream dependent on accurate product information, timely approvals and responsible operational ownership by Mayilon Silver.

2. Strategic Intent of Engagement

The Parties agree that the engagement shall follow a parallel sprint model, with research, branding, development, creative production, marketing and automation progressing in coordinated sequence where dependencies allow. W&W and QIQ AI will function as an integrated strategic and execution partner for Mayilon Silver within the approved Stage 1 scope.

Mayilon Silver will provide product information, approvals, operational inputs and access required to enable delivery. No deliverable may be treated as final until the applicable review and approval checkpoint is completed.

3. Scope of Work and Deliverables

3.1 Research, Intelligence and Brand Architecture

- Business, category, competitor and customer-persona mapping across silver jewellery, customised jewellery and D2C jewellery contexts.
- Tamil cultural jewellery storytelling and international Tamil audience research, subject to validation of claims and market evidence.
- Brand positioning, story, tone of voice, visual direction, typography and colour direction.
- Social media visual system, creative art direction, product-photography direction and brand-guideline documentation.
- Content pillars, campaign communication direction and copywriting framework for the Stage 1 creative system.

3.2 E-Commerce Web Portal and Customer System

- Responsive e-commerce portal MVP including home, category, product-listing and product-detail experiences.
- Product catalogue/upload structure, product enquiry or cart flow as technically and commercially approved, and user-profile foundation where scoped.
- Custom jewellery enquiry flow, lead-capture forms, WhatsApp enquiry integration and basic SEO/analytics setup.
- Admin/dashboard foundation, CRM dashboard and basic inventory-management structure, subject to final platform selection and available product data.
- POS-ready architecture and deployment support; not a full standalone POS product unless separately approved in writing.

3. Scope of Work and Deliverables (continued)

3.3 Marketing, Content, Creative and Advertising Preparation

- Instagram, Facebook and WhatsApp Business funnel direction, profile optimisation guidance and organic content calendar.
- Meta campaign architecture for website traffic, click-to-WhatsApp, product discovery and retargeting, subject to approved budget and platform-account readiness.
- Audience segmentation and international Tamil audience targeting hypotheses, to be refined from performance data and available consented customer insight.
- Fifty (50) static social-media creative outputs, including copy and content strategy, produced within the approved creative direction and revision boundaries.
- Twenty (20) AI-video generation outputs within the approved creative direction. Final quality, model likeness, third-party tool credits and external-generation limitations remain subject to the relevant tool and production constraints.
- Product, cultural, gifting and custom-jewellery storytelling directions; launch campaign framework and campaign reporting structure.

3.4 Automation, AI and Workflow Foundation

- WhatsApp lead-capture, inquiry-routing and basic customer-data capture workflow.
- CRM lead-status tracking, follow-up structure and custom-jewellery form flow.
- AI chatbot integration subject to selected platform capability, knowledge inputs, consent requirements and applicable subscription fees.
- Lead-routing, CRM and analytics event structure, with testing and handover documentation.

3.5 QA, Training and Handover

- Mobile responsiveness, website, product-upload, CRM, inventory, POS-ready structure, chatbot, WhatsApp automation and analytics readiness checks.
- Client training, operating SOP documentation, launch support and Stage 2 roadmap proposal.

4. Delivery Window and Sprint Plan

The primary delivery window is twenty-five (25) to forty (40) days beginning 25 June 2026, with a Stage 1 completion target of 28 July 2026. A buffer extension up to 4 August 2026 may be used only where approvals, product data, shoot logistics, campaign approvals or third-party dependencies delay delivery.

4. Delivery Window and Sprint Plan (continued)

Sprint	Indicative period	Primary outputs
1	25-30 Jun	Research, business mapping, category/competitor study, personas, funnel and content-pillar planning.
2	1-7 Jul	Brand positioning, story, tone, visual/creative direction, guidelines and 50-creative content architecture.
3	3-14 Jul	E-commerce portal MVP, catalogue/product structures, custom enquiry, CRM/inventory foundation, chatbot/WhatsApp and analytics setup.
4	14-21 Jul	Profile optimisation, campaign structure, calendar, 50 static creatives, 20 AI video outputs and launch campaign preparation.
5	21-28 Jul	QA, testing, lead routing, scheduling support, training, SOPs, handover and Stage 2 roadmap.

The timetable is an execution plan, not a guarantee of outcomes that depend on third-party platforms, approved data, production availability, advertising budget, customer response, shipping/logistics and Mayilon Silver's operational capacity.

5. Commercial Architecture

The approved commercial consideration for the Stage 1 Full-Stack Business Launch Package is **INR 3,40,000** (Indian Rupees Three Lakh Forty Thousand only), exclusive of GST and the exclusions set out in this MOU. This bundled price represents an integrated package and is not a per-module purchase order.

Workstream	Commercial value
Research, strategy and funnel planning	INR 25,000
Branding, visual identity and guidelines	INR 40,000
Website UI/UX and e-commerce portal development	INR 75,000
CRM dashboard and inventory-management foundation	INR 60,000
POS-ready structure and AI chatbot integration	INR 40,000
50 static creatives; copy and content strategy	INR 70,000
20 AI-video outputs; Meta campaign setup	INR 50,000
WhatsApp/lead-flow automation; QA, SOP, training and handover	INR 30,000
Total Stage 1 package	INR 3,40,000

5. Commercial Architecture (continued)

The modular value of the individual workstreams is stated in the proposal as INR 5,95,000. The Parties acknowledge that this figure explains the bundled value proposition only; the payable Stage 1 fee under this MOU is INR 3,40,000, subject to change-control provisions.

6. Payment Terms

Milestone	Share	Amount	Payment trigger
Advance payment	40%	INR 1,36,000	Due before project kickoff and resource allocation.
Strategy + branding approval	25%	INR 85,000	Due after the Sprint 2 review / approval checkpoint.
Web portal alpha demo	25%	INR 85,000	Due on the alpha demonstration, expected around 14-18 July 2026.
Final handover	10%	INR 34,000	Due before final delivery, deployment handover or release of final production assets, whichever occurs first.
Total	100%	INR 3,40,000	Exclusive of GST and third-party / production actuals.

Invoices are payable within three (3) calendar days of issue unless the Parties agree otherwise in writing. W&W and QIQ AI may pause work, defer releases, withhold account handover or revise delivery dates where a milestone remains unpaid. Late payment does not waive any commercial or intellectual-property right held by W&W or QIQ AI.

7. Exclusions, Third-Party Costs and Change Control

The Stage 1 fee excludes Meta ad spend; model, photographer, videographer, studio, location, props, styling, makeup, costume or crew costs; domain, hosting/server, payment-gateway, premium CRM/chatbot, premium AI-tool credits, AR SDK, 3D modelling, jewellery shoot, shipping/logistics costs and GST. These shall be paid by Mayilon Silver directly or reimbursed at actuals only after written approval.

Any requirement that changes the approved deliverable, integration, revision rounds, quantity, product data scope, launch timing, user journey, third-party tool, model/production input or acceptance condition requires a written change request stating scope, cost, delivery impact and approval owner. Work outside the approved scope will not commence without written authorisation.

8. Roles, Responsibilities and Dependencies

8.1 W&W responsibilities

- Lead business research, positioning, brand architecture, campaign strategy, content/copy direction, creative-system development and advertising planning within scope.
- Coordinate creative, review and reporting cadence; communicate dependencies and seek approvals at defined checkpoints.
- Provide the client-facing growth and commercial operating perspective across the Stage 1 programme.

8.2 QIQ AI responsibilities

- Lead web-portal, CRM, inventory/POS-ready structure, integrations, automation, AI-support and technical QA responsibilities within scope.
- Document functional choices, testing status, operational handover requirements and technical dependencies.

8.3 Mayilon Silver responsibilities

- Provide accurate and timely catalogue, SKU, price, inventory, purity/hallmarking, policy, product-image, branding, business and customer-proof inputs required for delivery.
- Nominate one authorised decision-maker and respond to submitted approvals, feedback and payment milestones without unreasonable delay.
- Own product truth, legal/regulatory compliance, product quality, shipping/returns, customer service, inventory accuracy, payment settlement and all business operations outside the agreed delivery scope.
- Provide and maintain lawful access to social, website, domain, payment, analytics, CRM and other required third-party accounts. Credentials shall not be placed in the MOU or unsecured channels.
- Obtain permissions for any model, customer, artisan, employee, location or supplier materials supplied for use in content, campaigns or website assets.

A delayed client dependency, missing product data, unapproved creative, unavailable third-party account or unfulfilled payment obligation will extend the timeline on a day-for-day basis and may require a revised launch plan.

9. Acceptance, Revisions and Launch Readiness

A deliverable is accepted when Mayilon Silver confirms approval in writing, uses it in a live environment, or does not provide consolidated feedback within three (3) business days of submission. Consolidated feedback must be specific, within scope and provided by the authorised decision-maker. Iterative creative and implementation work will be delivered within commercially reasonable revision boundaries; material rework is governed by change control.

9. Acceptance, Revisions and Launch Readiness (continued)

Launch readiness depends on accurate product data, approved claims, compliance/policy content, payment and shipping readiness, legal access to third-party accounts, responsive operational ownership, consented customer communications and successful agreed QA checks. No campaign performance, sales volume, ROAS, search ranking, platform approval or customer outcome is guaranteed.

10. Intellectual Property, Confidentiality and Data

Each Party retains ownership of pre-existing intellectual property, including frameworks, templates, prompts, processes, tool configurations, methods, software, automation modules, brand assets and know-how. Upon full payment, Mayilon Silver receives a licence to use final approved, paid-for brand, website, creative and campaign deliverables created specifically for Mayilon Silver for its business purposes.

W&W and QIQ AI retain the right to reuse generalised learnings, non-confidential methods, technical patterns and anonymised performance insight. Source files, editable project files, code repositories, paid third-party licences, raw model files, premium subscriptions and account credentials are transferred only where expressly listed in a signed handover schedule.

The Parties shall keep confidential all non-public business, financial, customer, product, technical, commercial and strategy information received through this engagement. Customer personal data shall be collected, used, stored and communicated only for approved purposes, with appropriate consent, access controls and applicable legal compliance. Neither party may use customer data for an unrelated purpose.

11. Term, Termination and Dispute Resolution

This MOU commences on the Effective Date and remains in force through Stage 1 completion and final handover, unless extended in writing. Either party may terminate for material breach not cured within seven (7) calendar days after written notice. Mayilon Silver remains responsible for all fees earned, approved work completed, committed third-party costs and work-in-progress costs up to termination.

The Parties will first attempt in good faith to resolve a dispute through senior representatives. If unresolved, the matter shall be referred to mediation or another mutually agreed dispute-resolution process. This MOU shall be governed by the laws applicable in India, and courts of Chennai shall have jurisdiction, subject to mandatory law.

12. Nature of Understanding

This MOU records the Parties' intention and agreed operating framework for Stage 1. The commercial, payment, confidentiality, intellectual-property, data, acceptance, change-control, liability and dispute-resolution provisions are intended to be binding. Any amendment must be recorded in writing and accepted by authorised representatives of the relevant Parties.

13. Signatures

By signing below, the authorised representatives confirm that they have read, understood and accepted this MOU and the attached Stage 1 engagement framework.
